HOW TO USE THIS CATALOG

INFO

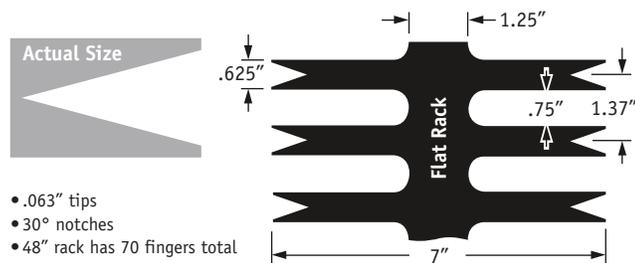

Introduction

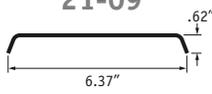

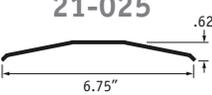

We are pleased to present what we believe to be the finest anodizing racking system available, the Sequel Anodizing Rack System. The Sequel system consists of Flat or Formed Racks, HD Density Box Racks, Recyclable Pin Racks, Flat or Formed Discs, Flat or Formed Clips, and many other items. If you are new to Sequel, please let us prove that *we are the best*. If you are a current customer, we sincerely thank you for your business and look forward to continuing to provide you quality materials in a timely fashion.

Item Numbers

Due to the large number of items offered, and because many of the items are available in multiple sizes, material thickness and assembly hole configurations, an Item Number is used for ordering each component (see example below). Using these item numbers will help us in processing your order quickly and accurately.

21 Series V-Notched Racks

Model	Hole Style (Pg. C2)	Lgth (Inches)	6061 ALUM (.063)	6061 ALUM (.080)
21 (Flat Rack)	RK1	24	101600	101840
	RK1	36	01680	101920
	RK1	48	101760	102000

	RK3	36	101720	101960
	RK3	48	101800	102040
21-09 	RK1	24	104800	104920
	RK1	36	104840	104960
	RK1	48	104880	105000
	RK3	24	104820	104940
	RK3	36	104860	104980
	RK3	48	104900	105020
21-025 	RK1	24	107200	107320
	RK1	36	107240	107360
	RK1	48	107280	107400
	RK3	24	107220	107340
	RK3	36	107260	107380
	RK3	48	107300	107420

Use the Item Number when ordering.

Many components such as the rack shown above are available in Flat or Formed versions. These items generally are offered in .063" and .080" 6061-T6 aluminum. In some instances, as manufacturing requires, some may be only available in .050" aluminum.

Throughout the catalog you will find helpful illustrations that suggest ways to use Sequel products. If you have any questions about racking or how to use our components, please give us a call at **800-553-8273** or fax them to us at **952-448-3848**. You may also e-mail questions or suggestions to us at info@anodizingracks.com.

Ordering

Many of the items in this catalog are available in multiple sizes, material thickness and assembly hole configurations. When ordering please use the Sequel item number, (see example on page A2). Using these item numbers will help us in processing your order quickly and accurately. Please see the enclosed Price List for all pricing. Our minimum order is \$100.00 US. Prices are subject to change without notice.

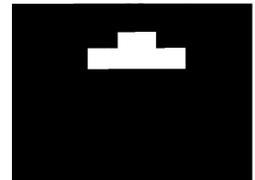

952-448.3870 for
International Orders

Discounts

Sequel Anodizing Racks offers discounts based on the quantity ordered. The price for a single unit of any item is shown in the Price List under the column "\$US Each". The columns that follow indicate the cost of each item based on our discount levels. Discounts apply to each item, i.e. several items cannot be combined to meet the quantity level.

Shipping

Sequel Anodizing Racks offers **GROUND SHIPPING**. Orders are shipped from our manufacturing plant in Chaska, Minnesota by United Parcel Service or FedEx Ground. If you have another shipping preference we will accommodate your wish to ensure that your shipment arrives within your time requirement.

Payment Terms

Payment terms are Net 30 Days for open account customers. A Finance Charge may be applied to all past due invoices at a rate of 1.5% per month, which is an annual rate of 18%. New customers will be sold to on a pre-pay or credit card basis until credit is established. We add a processing fee of 3% for Credit Card payments. New customers may apply for open account status by submitting four credit references complete with telephone numbers, fax numbers and addresses. All returned checks will be assessed a bank fee.

TECHNICAL INFORMATION

Bending Information

When bending 6061-T6 aluminum the radius required is 1½ to 2 times the thickness of the material used. Any bending using a smaller radius will seriously weaken or break the material. For reference, see the example shown below.

The Chemical Composition Limits of Aluminum Alloys

Percent of Alloying Elements—Aluminum and Normal Impurities Constitute Remainder										
Aluminum Alloy	Silicon	Iron	Copper	Manganese	Magnesium	Chromium	Zinc	Ti	Others

Disc Brackets

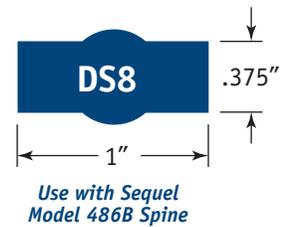

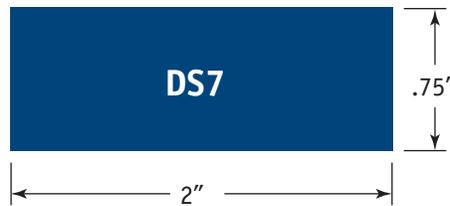

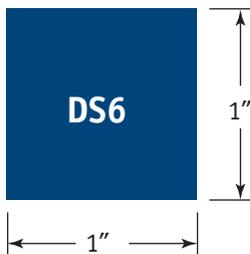

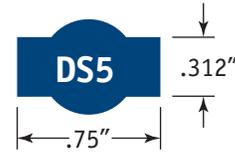

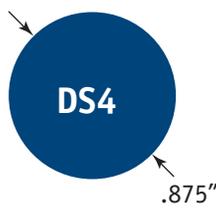

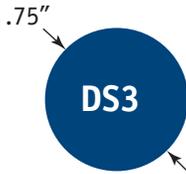

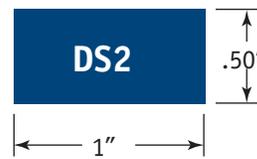

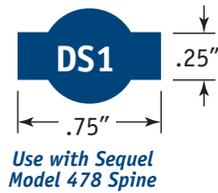

192 B9

The listed dimensions of Formed Discs are based on .080" thick aluminum. Dimensions for other thicknesses will vary.

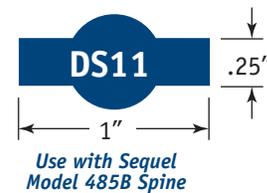

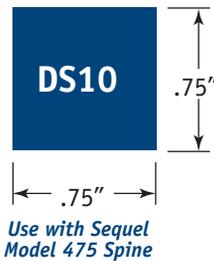

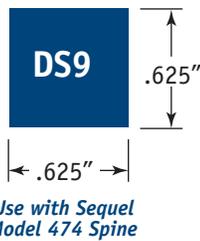

HOLE STYLE OPTIONS FOR SEQUEL DISCS

Note: All Disc Holes are slightly over-sized from dimensions listed.

NOTE: When using 192 Disc Brackets with DS6, special disc mounting holes are required.

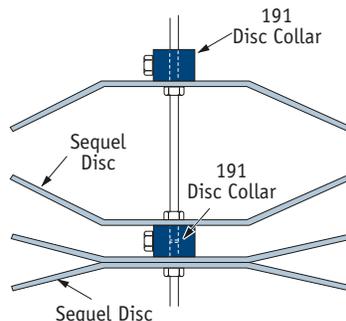

NOTE: Will not work with Model 192 Disc Brackets.

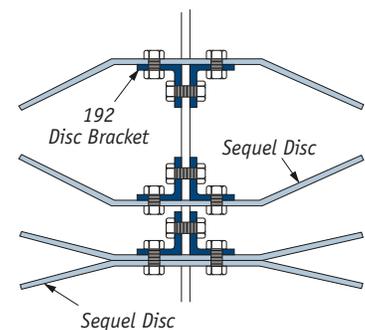

DS10 NOTE: When using 192 Disc Brackets, special disc mounting holes are required. An additional charge may apply.

USING DISCS WITH COLLARS OR BRACKETS

Simply attach the Disc Collar to the Spine using two 1/4-20 x 1" Bolts. For Back-to-Back applications, bolt another Disc to the other side of Collar using 1/2" bolts instead of 1" bolts. Adjust the Disc vertically on the Spine by tightening the 1/4-20 Side Bolt. See page B9.

Sequel Model 192 Disc Brackets may be used in pairs to attach a Sequel Disc to the Spine. The Disc Bracket is designed to be used with Sequel Discs having Hole Styles DS1, DS2, DS5, DS8, DS9 and DS11. They may also be used with DS6 and DS10 if the Discs are ordered with special holes. See page B9.

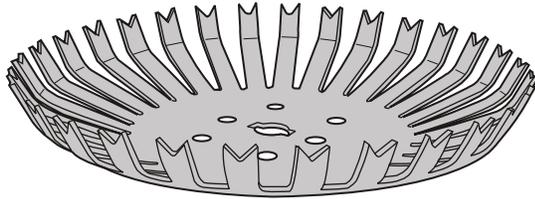

⬅️ ➡️ Dimensions of Formed Discs are based on .080" thick aluminum. Dimensions for other thicknesses will vary.

How to use Sequel 82A or 82B Notched Discs

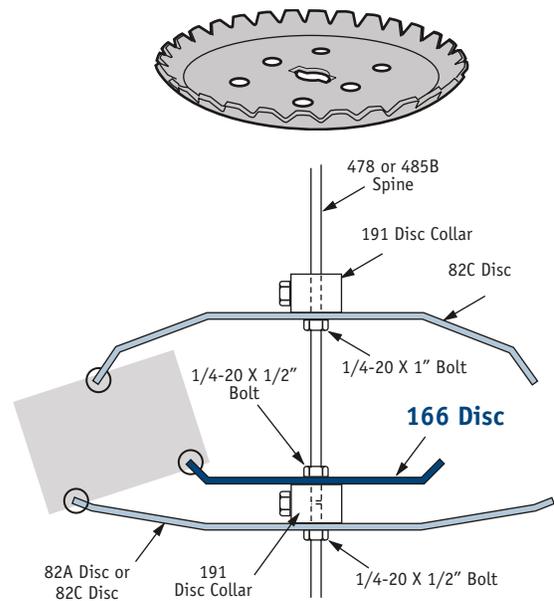

Shown is a typical assembly with several discs being held on a spine using Sequel 191 Disc Collars. The spacing is easily adjustable and any number of discs may be used, depending on the size of the parts being racked.

Note: When attaching one Disc to Collar use 1" bolts. When attaching Discs to both sides use 1/2" bolts.

166 V-Notched Insert Disc

The 166 Disc was designed to be used with the Model 82A and 82C Disc to achieve 3-Point contact as shown in this illustration.

191 Disc Collar (pg. B9) 82-11E Disc

82-2 or 82-8 Slotted Disc

OR

191 Disc Collar 82-10 Oval Pierced Disc

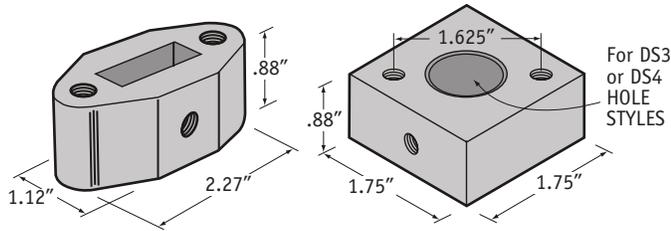

82-6E (pg. B6) or 82-11E Disc

OR

82-11E Disc

82-6E U-Notched Disc

191 Disc Collars

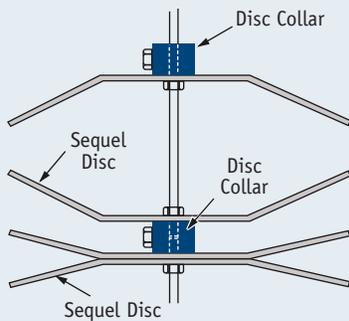

1/4-20 fasteners not included.
Bolt hole spacing is designed for Sequel Discs only.

Model	6061-T6 AL
191-DS1 (for 1/4" x 3/4" Spine)	998071-DS1
191-DS3 (for 3/4" Dia. Spine)	998071-DS3
191-DS4 (for 7/8" Dia. Spine*)	998071-DS4
191-DS8 (for 3/8" x 1" Spine)	998071-DS8
191-DS11 (for 1/4" x 1" Spine)	998071-DS11

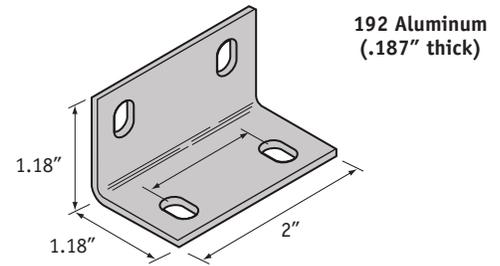

* The 191-DS4 Collar will also fit a Model 474 (5/8" x 5/8") Plain Spine.

How to use Sequel 191 Series Disc Collars

Simply attach the Disc Collar to the Spine using two 1/4-20 x 1" Bolts. For Back-to-Back applications, bolt another Disc to the other side of Collar using 1/2" bolts instead of 1" bolts. Adjust the Disc vertically on the Spine by tightening the 1/4-20 Side Bolt.

192 Disc Bracket

Model	6063 AL
192	998070

How to use Sequel 192 Disc Brackets

The Sequel Model 192 Disc Bracket is used in pairs to attach a Sequel Disc to the Spine. The Disc Bracket is designed to be used with Sequel Discs having Hole Styles DS1, DS2, DS5, DS8, DS9 and DS11 (see page B2).

NOTE: These Disc Brackets may also be used with DS6 and DS10 if the Discs are ordered with special mounting holes. An additional charge may apply for these holes.

RACK HOLE STYLE OPTIONS

NOTE: Every Hole Style is not available on all Racks.

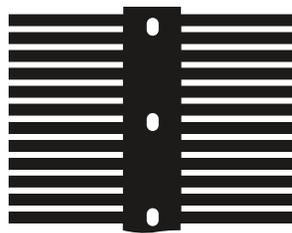

RK1

Rack Section with no holes.

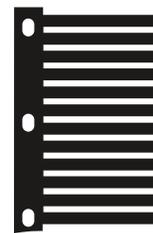

RK2

Half Rack Section with no holes.

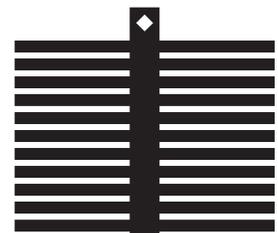

RK3

Elongated holes for 1/4" Bolts, 2" CTC, running the length of the Rack.

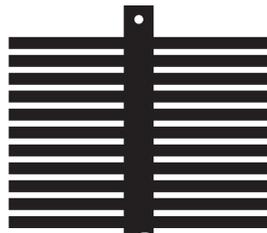

RK4

Half Rack Section Elongated holes for 1/4" Bolts, 2" CTC, running the length of the rack.

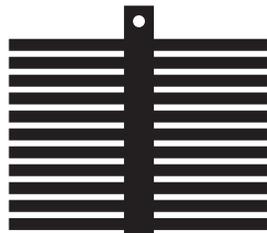

RK5

Diamond-shaped hole at each end for 1/4" Bolt or use with a Utility Rack Holder (shown on page D6).

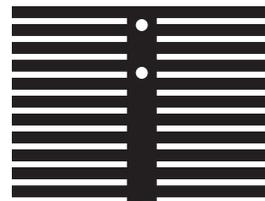

RK6

Hole at each end of Rack Section for 3/16" Rivet.

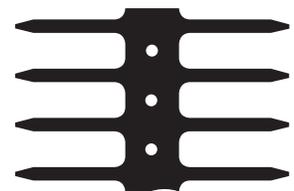

RK7

Hole at each end of Rack Section for 1/4" Bolt or Rivet.

RK8

Two holes for 1/4" Bolts or Rivets, 1" CTC at one end of Rack Section. For use with Sequel Hooks (shown on page F7).

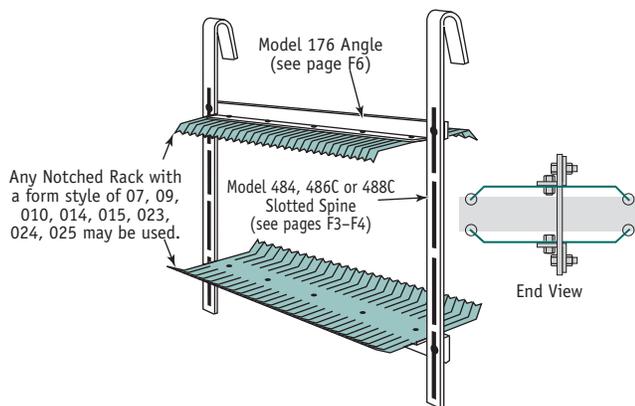

RK9

Holes for 1/4" Bolts matching the finger spacing of the Rack Section.

HOW TO MAKE A GENERAL BOX RACK SETUP

Note: The racks shown below are just suggestions. Other rack models and forms may be used to make a Box Rack Setup.

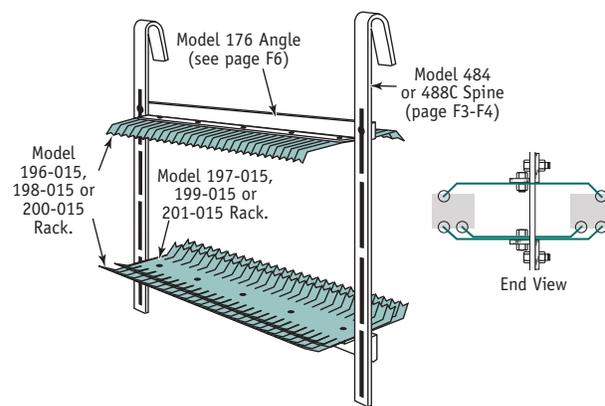

2 or 4 Point Contact.

This "Box Rack" may be made in a 2-point or 4-point contact assembly as shown above. Add as many tiers as the parts being racked allow.

Order the Sequel Racks with Hole Style RK3, which will match the holes in the Model 176 Angle. After fastening the racks to the angle, attach a Model 484 Slotted Spine to each end of the rack/angle assembly.

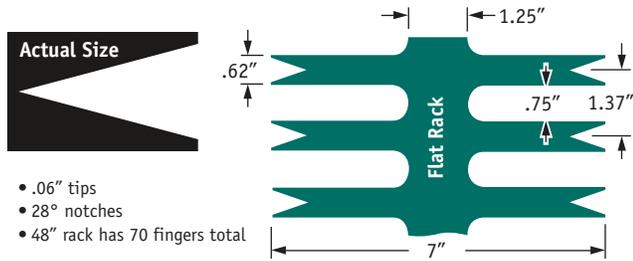

3 Point Contact

The typical "Box Rack" becomes a 3-point contact assembly by adding a smaller rack (197-015, 199-015 or 201-015) inside a larger matching rack (196-015, 198-015 or 200-015) to one of the assemblies as shown above.

⬅️ ➡️ *Dimensions of Formed Racks are based on .080" aluminum. Other thicknesses will vary.*

21 V-Notched Rack Series

- .06" tips
- 28° notches
- 48" rack has 70 fingers total

Model	Hole Style (Pg. C2)	Lgth (Inches)	6061 ALUM (.063)	6061 ALUM (.080)

How to use Sequel 105D Dimpled Racks

105D Dimpled Rack

Actual Size

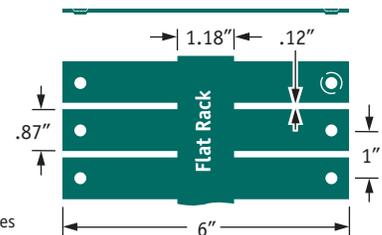

- .12" diameter dimples
- 48" rack has 192 fingers total

Model	Hole Style (Pg. C2)	Lgth (Inches)	6061 ALUM (.063)	6061 ALUM (.080)
105D (Flat Rack)	RK1	24	228500	228600
	RK1	36	228501	228601
	RK1	48	228502	228602
	RK3	24	228503	228603
	RK3	36	228504	228604
	RK3	48	228505	228605

109DP Dimpled & Pierced Rack

Actual Size

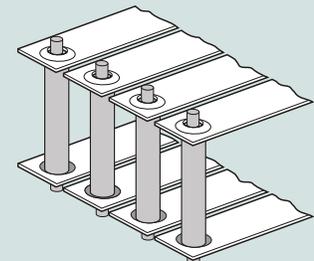

- .44" dimples with .25" holes
- 48" rack has 96 fingers total

Model	Hole Style (Pg. C2)	Lgth (Inches)	6061 ALUM (.063)	6061 ALUM (.080)
109DP (Flat Rack)	RK1	24	229480	229720
	RK1	36	229560	229800
	RK1	48	229640	229880
	RK3	24	229520	229760
	RK3	36	229600	229840
	RK3	48	229680	229920

Using a Sequel 109DP Dimpled & Pierced Rack

The 109DP Rack is ideal for racking rods that have pins at the end that cannot have rack marks on them. Dimples in the rack allow it to hold the part without touching the end of the pin.

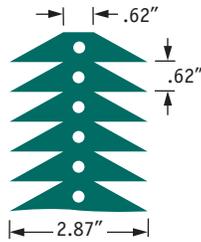

167-3R Pointed Rack

Actual Size

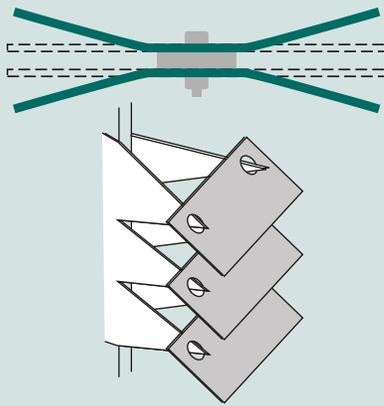

- Sharp tips
- 36" rack has 118 fingers total

Model	Hole Style (Pg. C2)	Lgth (Inches)	6061 ALUM (.050)	6061 ALUM (.063)
167-3R (Flat Rack)	RK9	24	276920	277160
	RK9	30	276940	277180
	RK9	36	277000	277240

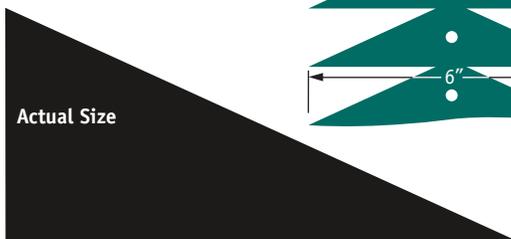

How to use Sequel 167-3R or 167-6R Racks

Bolt a Sequel Model 167-3R or 167-6R Pointed Rack on each side of a spine and spread the fingers apart to accommodate the part being racked.

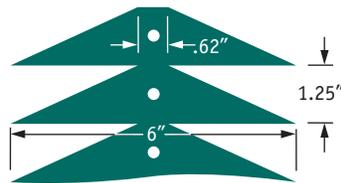

167-6R Pointed Rack Series

- Sharp tips
- 36" rack has 76 fingers total

169-011

How to use Sequel 169-011 or 169-012 Racks

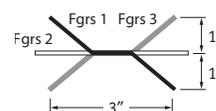

The Model 169-011 (also referred to as a "Small Utility Rack") works well for racking small parts. Simply squeeze the tips together to fit inside the part.

A typical 169-011 Rack setup would consist of either a Model 478H Hook bolted to the top of the Rack or when additional rigidity is required, the Rack should be bolted to a Model 478A Pierced Spine.

	RK5	24	286640
	RK5	36	286760
	RK7	24	286680
	RK7	36	286800
	RK8	24	286700
	RK8	36	286820

169-0134

Use two of these racks back-to-back or one on each side of spine, then spread the fingers apart to hold the part.

170-0164

For single-rack installations, bolt a Model 478H Hook (page F7) or Model 478A Spine (page F3) to the rack.

For multiple rack applications use either of the Sequel Utility Rack Holders. Available in 6 rack or 12 rack versions (page D5), the URH allows the rack to be easily snapped onto pins at the top and bottom. Order Racks with the RK5 Hole Style.

Bolt a Model 478H Straight Hook to top of rack (order rack with RK8 Hole Style)

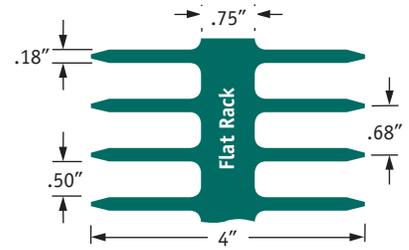

Bolt a Model 478A Spine to the rack (order rack with RK3 Hole Style)

Snap racks onto 6-Way Utility Rack Holder (order racks with RK5 Hole Style)

Snap racks onto 12-Way Utility Rack Holder (order racks with RK5 Hole Style)

171-026

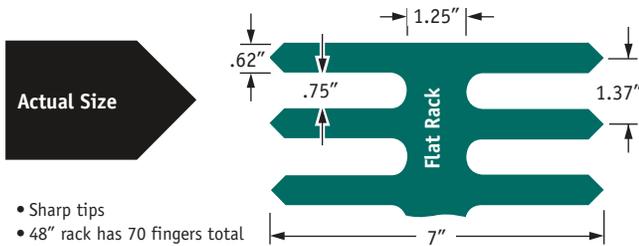

Using 171-026 Racks for parts with holes

Bolt two Racks on each side of a spine as shown in this illustration. Use a pair of rack fingers from the same side to hold the part, spreading the fingers apart as needed to hold the part securely.

Bolt a rack on opposite sides of a 475A spine as shown here. Bolt two more racks one hole down on the other two sides. Use a pair of rack fingers from opposite sides to hold the part, spreading the fingers apart as needed to hold the part securely.

Using the Sequel 112 and 202 Series Racks

Sometimes referred to as "Coin Racks", the 112, 202 and 208 Series Racks are a great solution for racking thin, round parts. The elongated shape of the slot helps prevent twisting of the parts.

They also work very well with smaller panels. If the part is square turn the part so that opposing corners fit into the slots. If the part is rectangular in shape order either a 112F or 202F which has a bend in the center of the slot allowing the part to be placed flat side down.

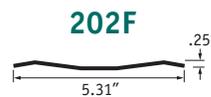

202 Slotted Rack Series

How to use the Sequel 147 and 148 Racks

The shear cut between the fingers on these racks allow the racking of small parts.

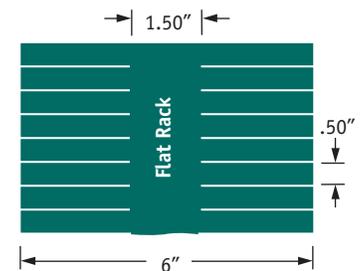

Fasten the rack to a spine, separate the fingers, insert the part and release the finger to hold the part under tension.

148 Square Rack

Actual Size

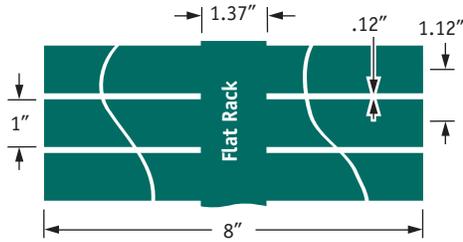

- Sheared cut between fingers

Racking tubes using Sequel 23XXX Series Racks

This typical assembly uses Rack Sections in pairs, one on each side of a spine.

The spines are then assembled with a Cross Member at the top and the bottom, to form a rigid assembly. For long tubes, use an assembly as shown, with full rack sections in the center and half rack sections on each end.

23025 Square Rack

✓ Racking channels using Sequel 23XXX Racks

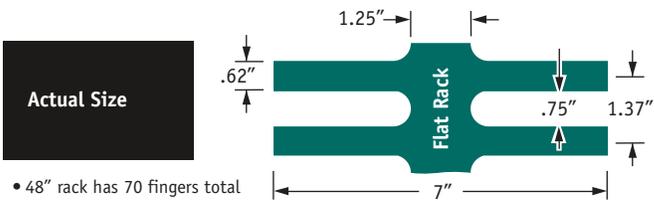

Order racks that have a finger width slightly larger than the opening of the part. Give each finger a slight twist before inserting it into the opening in the extrusion.

Side View

End View

Shown are two views of the rack finger twisted and inserted into a part. Note the edges of the finger contacting the part under tension.

✓ Racking channels using Sequel 184XXX Racks

Order racks that have a finger width slightly larger than the opening of the part. Give each finger a slight twist before inserting it into the opening in the extrusion.

Shown are two views of the rack finger twisted and inserted into a part. Note the edges of the finger contacting the part under tension.

How to use Sequel 136 and 137 Angled Racks

These racks are ideal for racking small parts or tubes using one or pairs of fingers inserted into the opening of the part. Note that the racks come flat, bend the fingers to the shape required for your application.

Assembly Using One Rack

Use the Model 136 Rack to hold parts with holes .125" diameter or less.

Assembly Using Two Racks

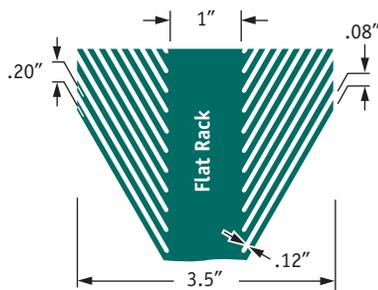

For tubes with larger openings, use the Model 136 or 137 Rack as shown here. Bend the fingers as needed using a pair of fingers staggered alternately.

137 Angled Rack

Actual Size

- 48" rack has 200 fingers total

How to use Sequel 226, 229, 232 or 235 Racks

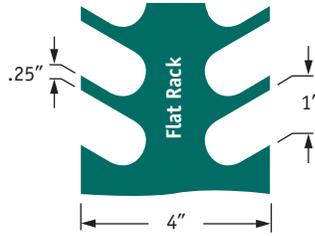

Model 226, 229, 232 or 235 Angled Racks may be used to hold long, lightweight parts.

Insert the part between the rack fingers at one end of the assembly, twist the part 180° and insert the other end into the fingers at the other end. Release the part and it will be held in place.

235 Angled Rack

Actual Size

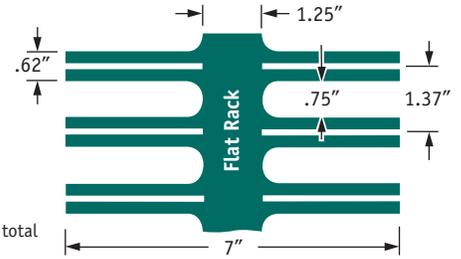

- 48" rack has 52 fingers total
- Slot dimension are +.03" to allow racking of standard dimension parts.

✓ Suggested use for 22-018 and 22-019 Racks

22-018

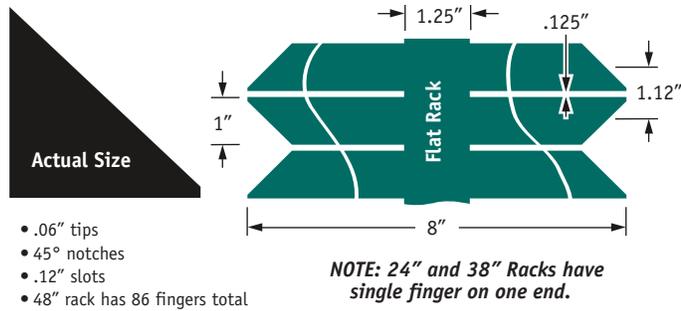

Bolt one rack to each side of Spine, spread fingers apart to fit the part. For closer spacing attach both racks to the same side of the Spine.

22-019

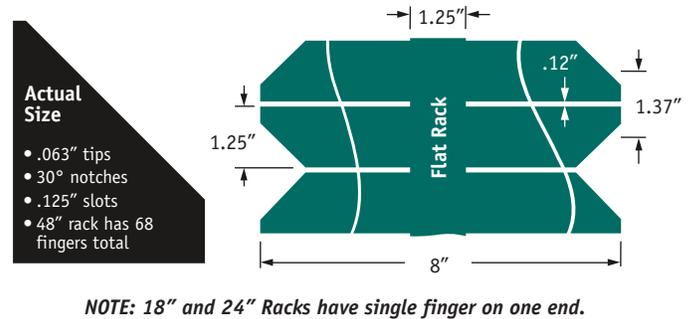

Form 019 provides a wider spacing of the tips. When nesting racks rotate the second rack 180° from the first.

✓ How to use 306SFN-015 and 311SFN-015

The Sequel Model 306SFN-015 Formed Split Finger Rack may be used to hold tubes up to 2 inches I.D. The Model 311SFN-015 is for tubes up to 2-1/2" I.D.

Insert the part over two of the rack fingers on the top rack, lift slightly and snap over two fingers on the bottom rack. Release the part and it will be held in place.

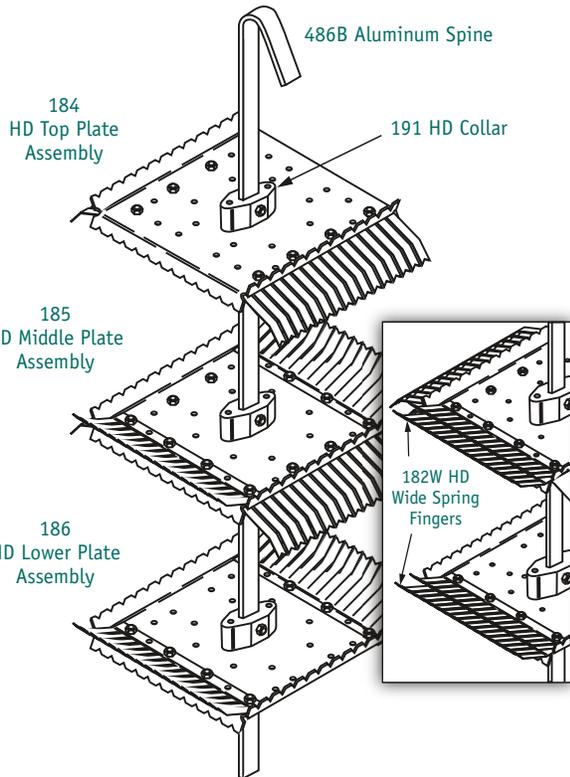

Model 176 Angle (see page F6)

Model 484 or 488C Slotted Spine (see page F3-F4)

Model 306SFN-015 or 311SFN-015 Formed Split Finger Racks

Dimensions of Formed Racks are based on .080" aluminum. Other thicknesses will vary.

184/184W HD Top Plate Assembly

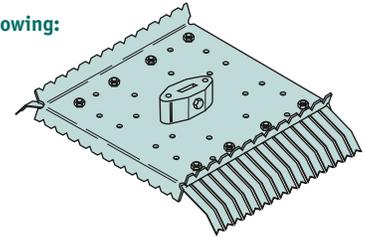

184 assembled from the following:

- (1) 180 HD Plate
- (1) 191 HD Collar
- (2) 182 HD Spring Fingers
- All required fasteners

184W adds the following:

- (2) 182W HD Spring Fingers for 3-point contact

Model	Aluminum
184	600140
184W	600145

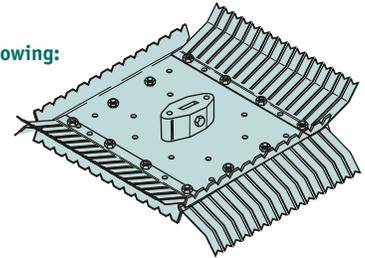

185/185W HD Mid Plate Assembly

185 assembled from the following:

- (1) 180 HD Plate
- (1) 191 HD Collar
- (4) 182 HD Spring Fingers
- All required fasteners

185W adds the following:

- (4) 182W HD Spring Fingers for 3-point contact

Model	Aluminum
185	600180
185W	600185

16 racking positions on each of its four sides allows a large number of parts to be racked—more than double the amount of our normal Disc Rack (see Section B). This assembly utilizes a specially designed plate (180 HD Plate) with spring fingers (182 HD Spring Fingers) mounted either facing up or down depending on the application. For situations that requires 3-point contact racking add, our 182W Wide Spring Fingers to the configuration.

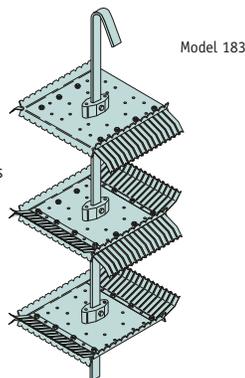

The assembly **MUST** have a 184HD Top Plate Assembly at the top and a 186HD Lower Plate Assembly at the bottom. When additional tiers are required add extra 185HD Middle Plate Assemblies.

183/183W HD Rack Assembly

Assembled from the following:

- (1) 184 or 184W HD Top Plate Assembly
- (1) 185 or 185W HD Middle Plate Assembly
- (1) 186 or 186W HD Lower Plate Assembly
- (1) Spine with Hook
- All required mounting hardware and fasteners

Note: If additional tiers are required, order extra 185 or 185W HD Middle Plate Assemblies as needed.

Model	Spine Length (Inches*)	Aluminum
183	36	600040
	42	600060
	48	600080
	54	600100
183W (with additional Wide Spring Fingers)	36	600045
	42	600065
	48	600085
	54	600105

*Spine length is measured before bending hook

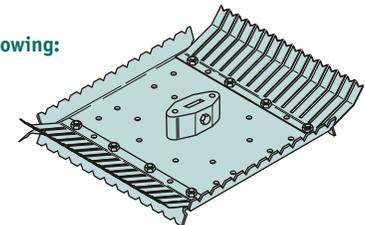

186/186W HD Lower Plate Assembly

186 assembled from the following:

- (1) 180 HD Plate
- (1) 191 HD Collar
- (2) 182 HD Spring Fingers
- All required fasteners

186W adds the following:

- (2) 182W HD Spring Fingers for 3-point contact

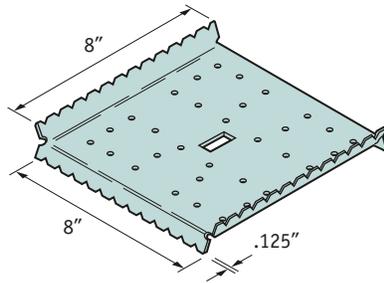

Model	Aluminum
186	600220
186W	600225

HD Rack components are shown on the next page

READING SEQUEL PIN RACK NUMBERS

Sequel offers a large number of Pin Racks in various pin diameters, pin lengths and pin spacing. The figure below shows how to read the item number to determine the Pin Rack that will meet your specific requirements. If you require a pin spacing that is not listed, contact us, we have the capability to produce custom spacing for virtually any requirement. Sequel Pin Racks are uncoated, with pins securely swaged in place to minimize twisting. The main benefit to uncoated racks is the ability to *easily recycle racks* at the time of disposal. Coated racks are also available by special order.

PIN RACKS

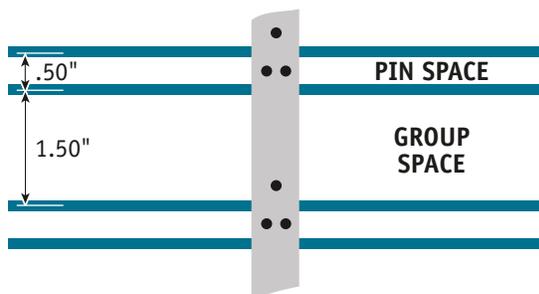

4W-60-2-75-1S

A B C D E F

- A. Indicates the style of Pin Rack. Sequel Pin Racks are available in 2-Way, 4-Way or 6-Way configurations.
- B. Indicates the total number of pins used to make the Pin Rack. In the example above the Pin Rack has 60 pins which make a total of 120 tips.
- C. Indicates the diameter of the pin used:
1= 1/8" (.125), 2= 5/32" (.156), 3= 3/16" (.187), 4= 1/4" (.25), 6= .144".
 In the example shown the pin diameter is 5/32" (.156).
- D. Indicates the "Pin Spacing", which is the center-to-center distance between the top pin and the second pin on the same side. In the example above the Pin Spacing is 3/4" (.75).
- E. Indicates the "Group Spacing", the center-to-center distance between the second pin and the third pin on the same side (if different than the "Pin Spacing"—see D). In the example at left the Group Space is 1".
- F. Indicates an optional pin variation.
 N = Notched S = 9" Pin Length

MULTI PIN-GROUP NUMBERING

Sequel offers Pin Racks with multi pin groups. Numbering for these Pin Racks is similar to our standard Pin Racks with the exception of the Pin Group style designation ("a" shown below). Choices are 2 Pin, 3 Pin or 4 Pin Groups, referenced as 2P, 3P (shown below) or 4P.

4W3P-60-6-50-1.5S

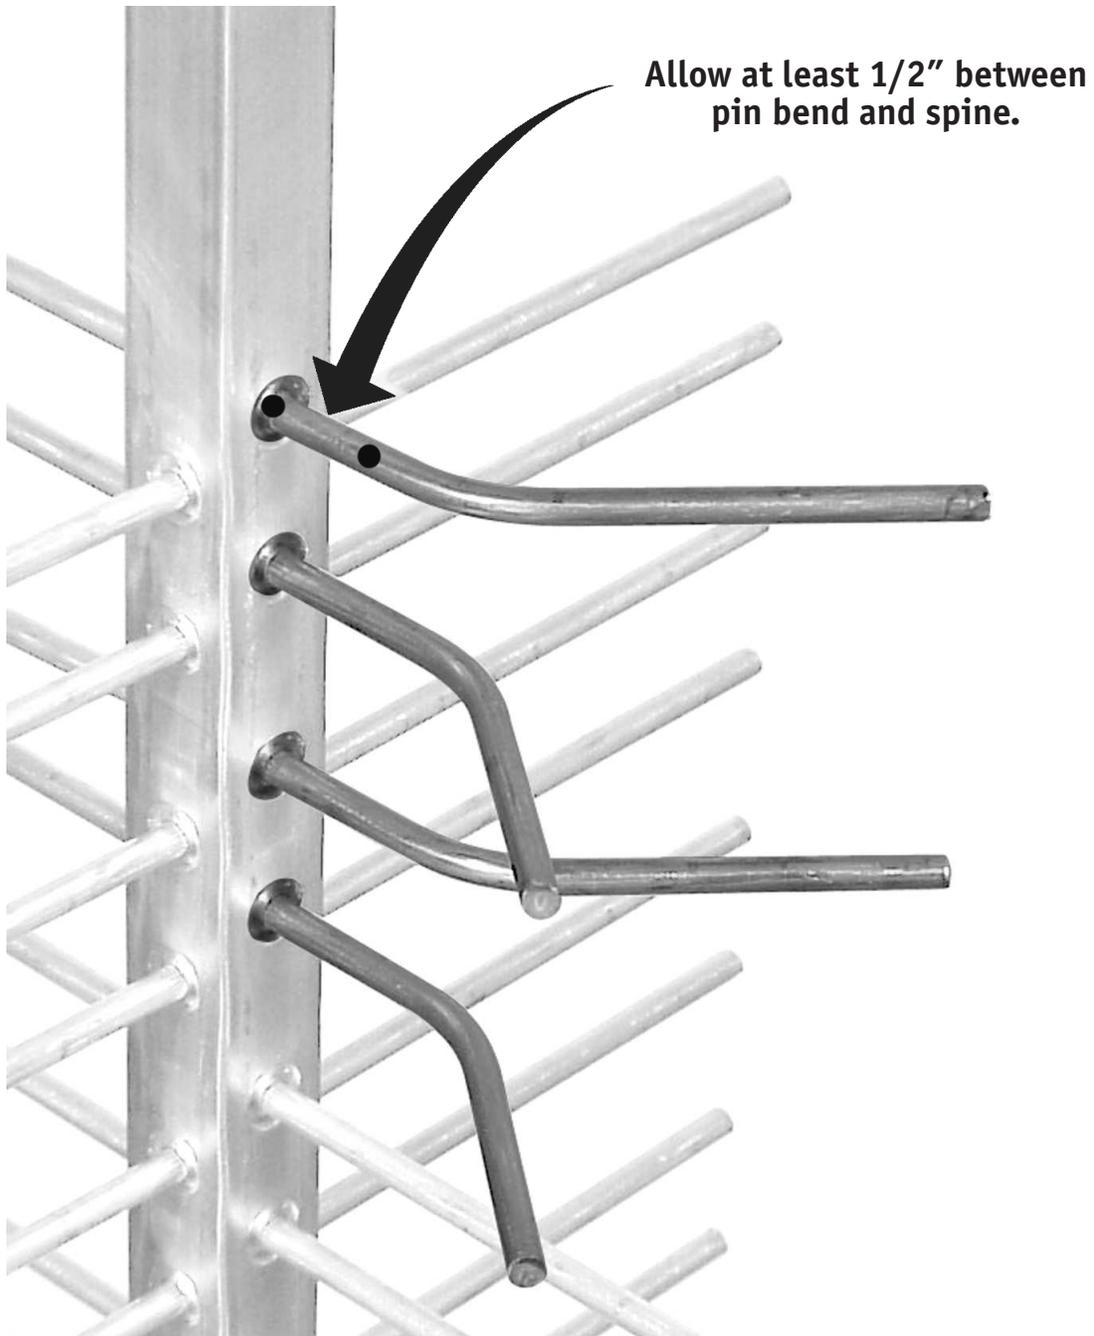

A a B C D E F

HOW TO BEND THE PINS

Sequel Pin Racks are manufactured in a way that does not require a vinyl coating to hold the pins in place. By proper bending of the pins you can increase the life of the Pin Rack.

The correct way to bend the pin is to allow at least 1/2" space between the bend and the spine. By doing so, less force is applied to the connection between the pin and the spine, allowing for greater current carrying capacity.

A good rule of thumb, *is* to use your thumb... or finger, between the spine and the bend. This will ensure that the bend is placed out far enough.

SINGLE PIN-GROUP PIN RACKS

Sequel offers single pin-group Pin Racks in 2-Way, 4-Way and 6-Way styles. Unless otherwise noted, Sequel Pin Racks have 7" pins. Sequel Pin Racks are uncoated, allowing for easy rack recycling at the time of disposal. *Notched Pins (N) and 90° Turned Hooks (T) may be available, please call.*

How to use Sequel 140C with 130C Clip

Space a pair of these clips as needed on a spine to hold part from the inside.

Three point contact is possible by using a combination of the 140C along with the 130C.

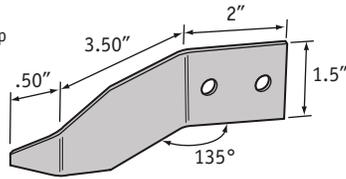

Dimensions of Formed Clips are based on .080" thick aluminum. Dimensions for other thicknesses will vary.

When using 1/4-20 bolts, order with Hole Style CL3 or CL4, depending on the style of clip.

How to use Sequel Tapered Clips

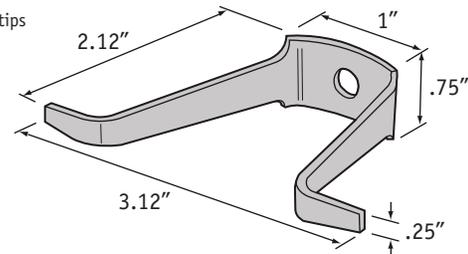

With tip sizes from .06" to .62", the Sequel Tapered Clips fit a wide range of holes.

An example of a clip assembly is shown here. Attach the Clips to a Sequel Spine (shown on pages F2-F5) and bend the Clips to fit.

- Sequel Tube Clips are designed to fit tubes from .75" to 2.00" I. D. and are available in Single or Double-side styles. For larger sizes please call!
- **Single-sided Tube Clips have double holes** allowing them to be bolted to a spine and bent down as required. *NOTE: The .75" I.D. Single Tube Clip has no holes.*
- **Double-sided Tube Clips are supplied without holes**, allowing them to be drilled and bolted or riveted to a spine as needed.

Sequel Tube Clip Assemblies feature Sequel Tube Clips securely spot-welded to the spine. Available in 36" and 48" spine lengths (including the hook), these assemblies are designed to hold up to 48 tubes. **The standard style has Angled Clips. For style with Straight Clips add a "S" to the end of Item Number.**

For another way to rack tubes, see Racks 306SFN-015 and 311SFN-015 on pages C29 and C30.

*Spine length is measured before we add the hook

Imagine a racking system that not only **requires no bolts or rivets**, but also **makes the job easier and faster**. Consisting of the A-Clip (available in two sizes and three styles) and the Sequel Model 486B spine (see page F4), Sequel Corporation's innovative **A-Clip Anodizing Rack System** can do just that.

A-CLIP

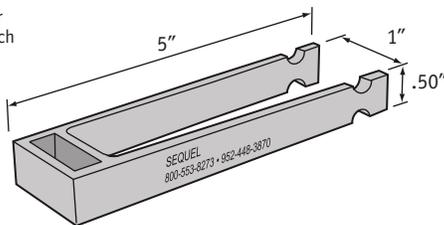

Anodizing Rack System

Racking parts with the A-Clip Anodizing Rack System is easy! Simply **secure the spine in a vise** or similar fixture, **drop on a large A-Clip** (Model A1-X, A1-XD or A-1XV), **place the part in the notches** and **drop on a small A-Clip** (Model A-1, A-1D or A1-V). Continue racking as many parts as the spine will hold. **Above the top part drop on a large A-Clip**. Then, **slightly flex the spine** to secure the parts with a tight, friction fit.

Unracking the parts is even easier! Just horizontally secure the spine in the fixture and flex slightly. The parts fall free from the clips. Optionally available with tapped threads for use with a 1/4-20 x 1/2" bolt, allowing for racking on both sides of the Spine.

A-1 A-Clip (Standard Notch)

✓ How to use Sequel 474A or 475A Pierced

The Sequel Model 474A and 475A Pierced Spines are designed to be used with Sequel Clips where a 4-Way setup is desired.

Simply bolt clips (Notched Clips shown here) to opposite sides of the Spine. Skip the desired spacing and bolt two more clips to the 90° surfaces of the Spine. Then bend the clips inward or outward to obtain the proper tension and attach the parts.

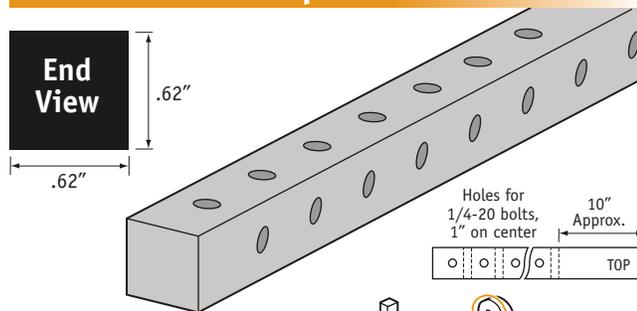

475A Pierced Spine

How to use the Sequel Slotted Spines

The Sequel Slotted Spine is designed to be used with the 176 Mounting Angle (page F7) and many Sequel Racks to make a "Box Rack Assembly".

Simply bolt the Rack to the appropriate length Mounting Angle using 1/2" or 3/4" bolts. Use 1" bolts to attach each end of the Angle to a Rack. The slots allow each Mounting Angle and Rack assembly to be easily adjustable up or down to accommodate almost any size part.

How to use Model 586 Spine is shown on the next page

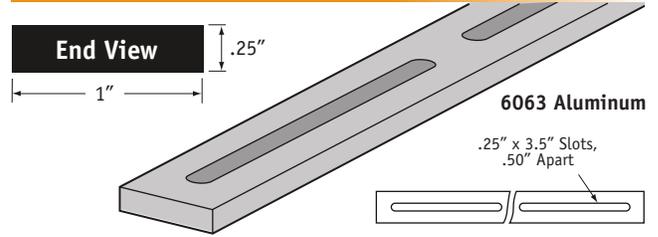

Using the 586 Titanium Slotted Spine

The Sequel Model 586 Titanium Slotted Spine is designed to be used with the Model 177 Titanium Horizontal Mounting Bar (page F7) and many Sequel Racks to make a "Box Rack Assembly".

Bolt the Rack to the appropriate length Mounting Bar using 3/4" bolts. Use 1" bolts to attach each end of the Mounting Bar to a Model 586 Slotted Spine. At the top of each 586 Slotted Spine attach a Model 485HT twisted Aluminum Hook.

PLEASE CALL FOR AVAILABILITY

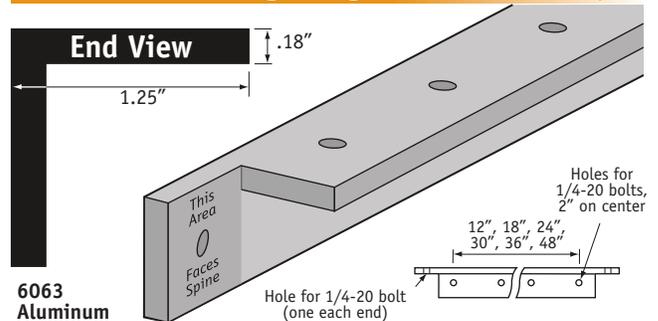

How to use the Sequel Cross Members

The Model 485 and 485TI Cross Members may be used in many ways, with just one shown here.

By using a combination of horizontal and vertical Cross Members and a single longer Spine with a twist, a "box rack" type setup can be made for attaching clips.

176 Mounting Angle (for Racks)

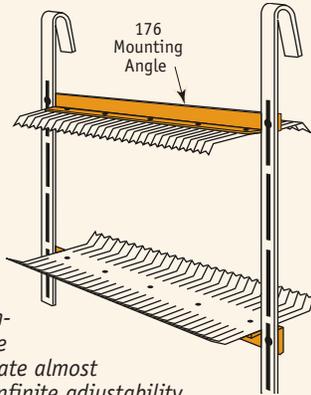

Model	For Rack (In)	Total Lgth (In)	For Rack (In)	Total Lgth (In)	
176	12	15	30	33	998063
	18	21	36	39	998065
	24	27	48	51	998067

HARDWARE

✓ How to use the Sequel 176 Mounting Angle

The Sequel Model 176 Mounting Angle attaches to Sequel Rack sections (see Section C) to make a "Box Rack Assembly".

Bolt the Rack to the appropriate length Mounting Angle using 1/2" or 3/4" bolts. Use 1" bolts to attach each end of the Angle to a Model 484 Slotted Spine. Using a Slotted Spine allows the Mounting Angle and Rack assembly to be easily adjustable up or down to accommodate almost any size part. When the infinite adjustability of a Slotted Spine is not needed, use the Sequel Model 485A Pierced Spine (page F4).

Hooks (14" long before hooking)

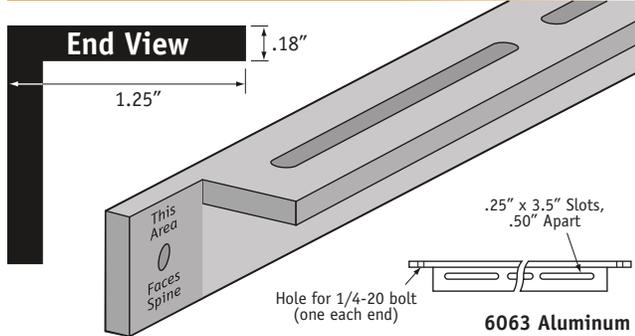

6063 Aluminum

- 475N or H (.75" x .75")
- 478N, H or HT (.25" x .75")
- 485N, H or HT (.25" x 1")
- 486N, H or HT (.375" x 1")
- 488N, H or HT (.25" x 1.25")
- 490N, H or HT (.25" x 1.5")

Hooks	Length (overall)	Straight (N)	Hook (H)	Hook & Twist (HT)

490N, 490H, 490HT	14	998115	998111	998113

176C Mounting Angle (for Clips)

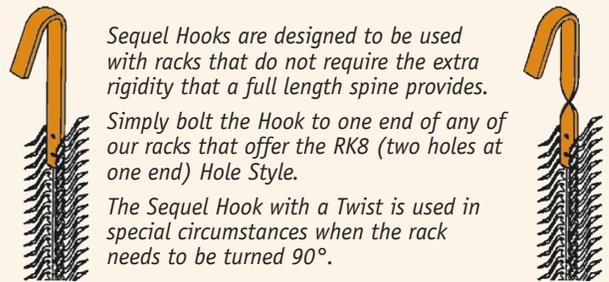

The Model 176C Slotted Mounting Angle offers a greater amount of flexibility for when Clips are bolted to the Mounting Angle.

Model	Sm. Flange Lgth (In)	Total Lgth (In)	
176C	12	15	998050C
	24	27	998060C
	30	33	998063C
	36	39	998065C
	48	51	998067C

✓ Suggested uses for the Sequel Hooks

Model 478H, 485H, 488H or 490H

Model 478HT, 485HT, 488HT or 490HT

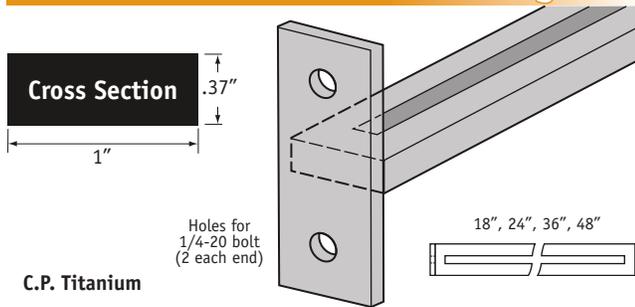

Sequel Hooks are designed to be used with racks that do not require the extra rigidity that a full length spine provides.

Simply bolt the Hook to one end of any of our racks that offer the RK8 (two holes at one end) Hole Style.

The Sequel Hook with a Twist is used in special circumstances when the rack needs to be turned 90°.

NOTE: Model 169, 169-011, 169-012, 170, 170-22, 171 and 171-026 Racks work only with the 478H or 478HT Hook.

177 Titanium Horiz. Mounting Bar

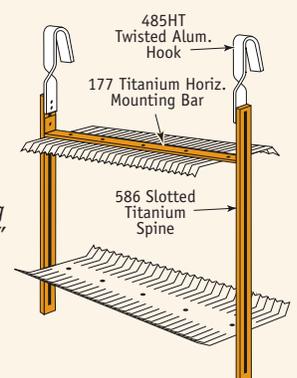

Model	For Rack Length	C.P. Titanium
177	18"	954520
	24"	954540
	30"	954560
	36"	954580

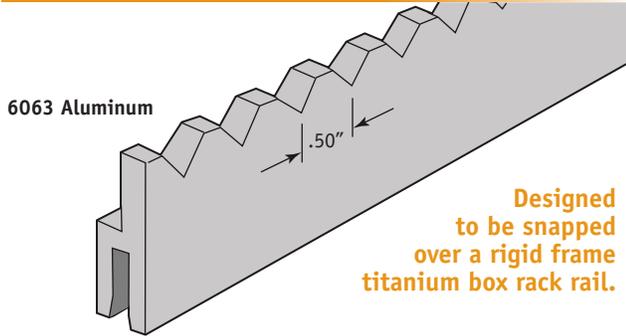

✓ Using the 177 Titanium Horiz. Mounting Bars

The Sequel Model 177 Titanium Horizontal Mounting Bar is designed to attach to Sequel Rack sections (see Section C) to make a "Box Rack Assembly".

Simply bolt the Rack to the appropriate length Mounting Bar using 3/4" bolts. Use 1" bolts to attach each end of the Angle to a Model 586 Slotted Spine. At the top of each 586 Spine attach a Model 485HT twisted Aluminum Hook.

Aluminum Contact Bar (H-Rail)

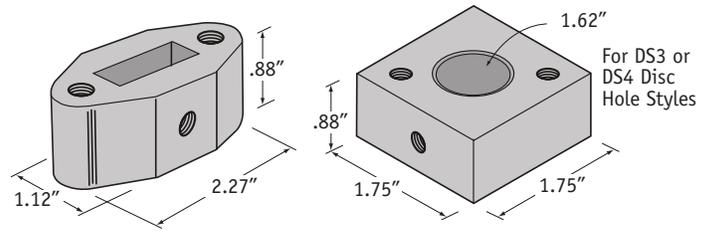

Designed to be snapped over a rigid frame titanium box rack rail.

	47.625	HN48

Aluminum Contact Bar

Disc Collars

1/4-20 fasteners not included. Bolt hole spacing is designed for Sequel Discs only.

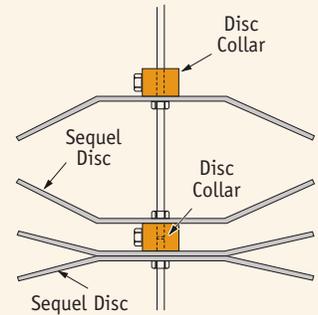

Model	6061 AL
191-DS1 (for 1/4" x 3/4" Spine)	998071-DS1
191-DS3 (for 3/4" Round Spine)	998071-DS3
191-DS4 (for 7/8" Round Spine*)	998071-DS4
191-DS8 (for 3/8" x 1" Spine)	998071-DS8
191-DS11 (for 1/4" x 1" Spine)	998071-DS11

* Model 474 (5/8" x 5/8") Plain Spines will fit in The 191-DS4 Collar.

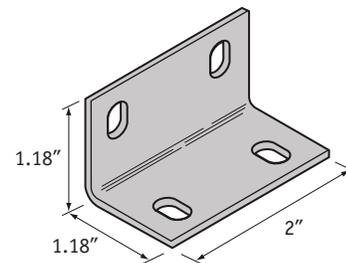

How to use the Sequel 191 Series Disc Collars

Simply attach the Disc Collar to Sequel Discs using two 1/4-20 x 1" Bolts.

For Back-to-Back applications, bolt another Disc to the other side of Collar using 1/2" bolts instead of 1" bolts. Adjust the Disc vertically on the Spine by tightening the 1/4-20 x 1/2" Side Bolt.

Disc Bracket

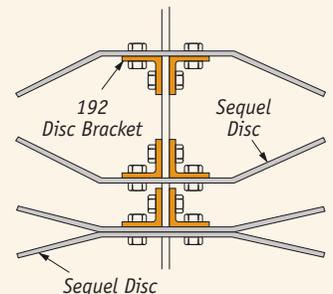

192 Aluminum (.187" thick)
192T Titanium (.063" thick)

Model	6063 AL	C.P. TI
192/192T	998070	998070T

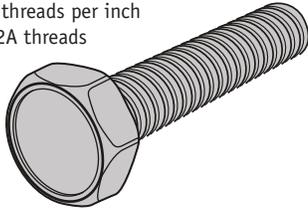

How to use the Sequel 192 Disc Brackets

The Sequel Model 192 Angle Bracket is used in pairs to attach a Sequel Disc to the Spine. The Angle Bracket is designed to be used with Sequel Discs having Hole Styles DS1, DS2 and DS8 (see page B2).

Hex Head Bolts

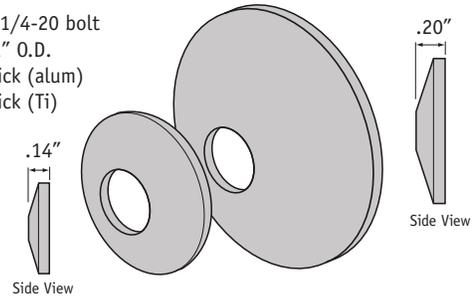

- 1/4" diameter, 20 threads per inch
- Full length, Class 2A threads
- 7/16" head

DURALOK™

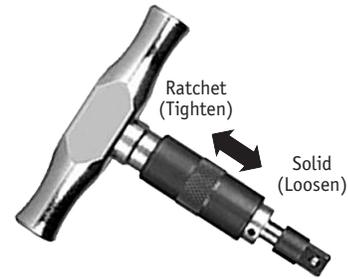

DURALOK™ FASTENING TOOLS are torque devices specifically manufactured to secure and re-release the screws of the Dura-clamp® and Quick-Set Clamp®. Each tool is individually set at the perfect torque to prevent over-tightening and provide excellent contact. A complete line of torque limiting tools are now available to meet your specific needs.

DCHT1
Ratchet for tightening only

DCHT2
Tool for tightening/loosening

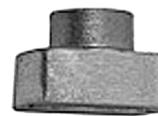

DCHT3
Ratchet for tightening and slide collar that locks for solid loosening

DURALOK™ SOCKETS are designed to quickly couple the screw of a Duraclamp® or the Quick-Set Clamp® to any one of the Duralok™ Fastening Tools.

DCSK-318
Socket for Duraclamp DC318

DCSK-476
Socket for Duraclamp DC476

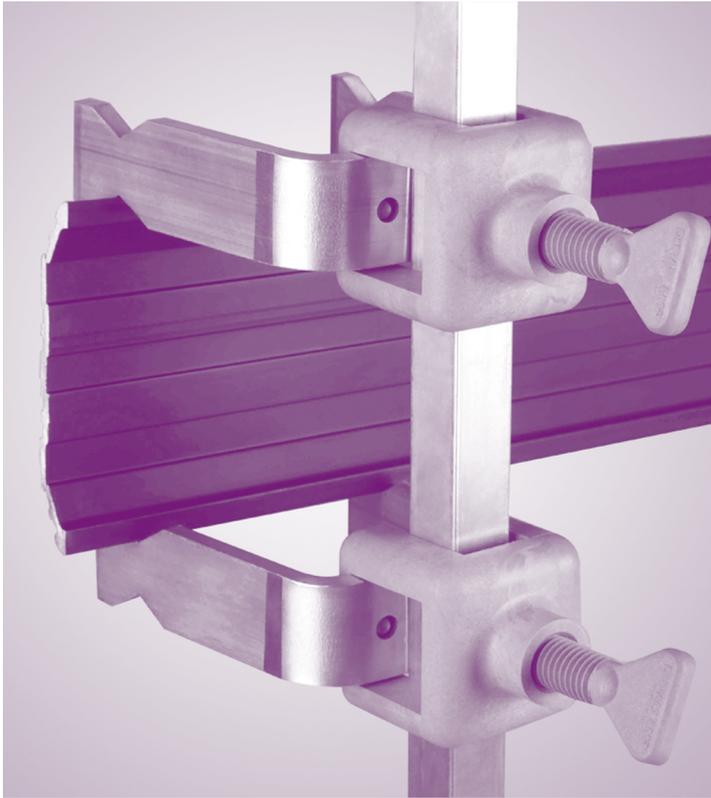

DCSK-MULTI
Socket for Duraclamp DC390, DC508 and DC635

DCSK-1016
Socket for Duraclamp DC1016

HEXIES® are hexagonal shaped, polypropylene floats with smooth rounded sides. Due to their unique design, HEXIES nest together to create a “work through” blanket that conserves energy and reduces costs by dramatically decreasing heat and fluid loss while suppressing odors and vapors. HEXIES have worldwide patents.

COMPARED TO SPHERE-SHAPED FLOATS

- ⊕ Hexies require only one layer for complete coverage
- ⊕ Hexies solid construction prevents sinking
- ⊕ Hexies can be used continuously in temperatures up to 212°F (100°C)
- ⊕ Hexies are completely resistant to all metal finishing chemicals except chromic acid

HEXIES ARE AVAILABLE IN TWO SIZES

- ⊕ 50mm (40 per sq. ft./400 per sq. meter)
- ⊕ 100mm (13 per sq. ft./130 per sq. meter)

HEXIES SAVE ENERGY

- ⊕ Field evaporation tests show that Hexies provide up to 90% reduction in fluid loss
- ⊕ Heat losses are reduced by 80%, meaning a dramatic savings on fuel costs

HEXFL50 HEXIE® 50mm polypropylene Hexagonal Float (40 per sq. Ft/ 400 per sq. Meter)

HEXFL100 HEXIE® 100mm polypropylene Hexagonal Float (13 per sq. Ft/ 130 per sq. Meter)
